This configuration might be edited if needed.

2 - Application Server

OVA-R3 - Xeon E3-1245v5

- »RAM: 32GB DDR4 ECC
- »HDD: 2x2TB HDD SATA Soft RAID (+ \$15.02 / month for 2x480 sata SSD)
- »Guaranteed Bandwidth / Traffic: 250Mbps 10TB traffic
- »Private Network: 100Mbps
- »Operating System Linux/BSD: any by demand
- »IPMI: KVM/IP graphical control access

Install fee (one time) \$49.97USD

Price / month \$70.00USD

Total \$119.97USD

Link: <https://my.unihost.com/cart.php?a=add&pid=1072&cur=1>

3 - Database Server

OVA-R3 - Xeon E3-1245v5

»RAM: 32GB DDR4 ECC

»HDD: 2x2TB HDD SATA Soft RAID (+ \$15.02 / month for 2x480 sata SSD)

»Guaranteed Bandwidth / Traffic: 250Mbps 10TB traffic

»Private Network: 100Mbps

»Operating System Linux/BSD: any by demand

»IPMI: KVM/IP graphical control access

Install fee (one time) \$49.97USD

Price / month \$70.00USD

Total \$119.97USD

4 - Server Management

Technical task:

1. Firewall
2. Router
3. Apache webserver
4. Jboss server
5. MySQL

Performing this task on every server requires a Premium Administration package.

Please note that the premium administration includes 3 cases, and they will all be used for your 3 servers.

Price (one-time) \$49.00USD
